

HW2: Problem 1

Ian Dover

1 Part A

Image converted to greyscale:

Figure 1: Greyscale dimensionally reduces the image and assigns weights to RGB values to created a weighted average.

2 Part B

2.1 Subsection 1

Image with zero-mean Gaussian white noise with variance of 0.01:

Figure 2: Greyscale image with gaussian noise applied.

2.2 Subsection 2

Image with salt-and-pepper noise, affecting approximately 5% of pixels:

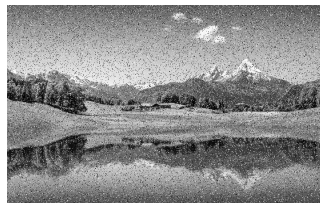

Figure 3: Greyscale image with salt-and-pepper noise applied.
